Where to seek out webroot Key Code?

The Webroot security package is simple to setup & install at webroot.com/safe. Simply find 20-character alpha-numeric code that is written on the backside of the retail card. Here may be a sample Product Key to let you understand:

XXXX-XXXX-XXXX-XXXX-XXXX

[Webroot Antivirus Installation Guide](#)

Antivirus and cyber security products from this brand are easy to use and install and can be done in a simple manner by following a few steps. The security package offered by this brand is incredibly easy to setup and install. You can easily install and upgrade any of the Webroot SecureAnywhere Antivirus products that help you handle cyber security in the best possible manner.

Here is how you can do it in three simple steps:

1. Start with setup and install at webroot.com/safe by downloading the software that you can do without a CD or DVD. All you need is a good internet connection for the purpose.
2. You will find a 20 character alpha-numeric code (xxxx-xxxx-xxxx-xxxx) which is your product key. If you buy retail card, you will find this unique code on the backside of the card that you need to enter.
3. Install Webroot with this Product Key by entering this unique product key to complete the installation process and clicking on the 'Submit' button.

With the Webroot.com/Setup Product Key, you can complete the installation process all by yourself. Here are a few troubleshooting tips for a smooth Webroot installation.

If the automatic download fails, you can call the helpline for assistance. Slow internet connections can lead to problems in downloading.

If you already have an anti-virus installed on your device, you will have to uninstall that first and remove it completely from your system.
